

UNIVERSITY OF
ARKANSAS

College of Engineering
Ralph E. Martin Department of
Chemical Engineering

Interested in getting research experience this summer?

Apply for the UARK Separations & Commercialization REU summer program!

The University of Arkansas Department of Chemical Engineering offers a summer Research Experience for Undergraduates (REU) program each summer focused on Separations & Commercialization. The in-person program runs from May 20, 2024- July 20, 2024. The program is open to students in chemical engineering, bioengineering, biology, chemistry, materials science, physics, or related majors who are currently enrolled at U.S. institutions.

Apply here!

Applications accepted until positions are filled

Questions? Email chegreu@uark.edu

For more information visit: <https://chemical-engineering.uark.edu/reu/>

Participants will receive:

- \$6,000 stipend for 10 weeks
- Hands on laboratory experience
- Mentoring by university professors and graduate students in the field
- Field trip to visit an industrial facility
 - On campus housing
- The chance to experience life as a Razorback!
