RALPH E. MARTIN
DEPARTMENT OF CHEMICAL ENGINEERING

SPRING 2020
AWARDS & SCHOLARSHIPS
GREETINGS

I wish that the students, faculty, and staff of the Ralph E. Martin Department of Chemical Engineering, along with our Distinguished High School Mentors, were able to be together for a Spring Banquet in 2020. I enjoy our tradition of celebrating outstanding accomplishments and recognizing the generous support of our alumni and friends at the end of the academic year. Unfortunately, COVID-19 is keeping us physically apart for now. I hope that we are soon able to celebrate in person and that in the meantime, you will enjoy this electronic copy of the usual program book.

David Ford
Professor, Kevin W. and Marie L. Brown Department Head Chair
May 4, 2020
"I GUESS THAT IT WAS IN MY GENES. MY GRANDMOTHER WAS A MATH TEACHER FOR FORTY YEARS IN CENTRAL ARKANSAS. MY MOTHER SERVED IN ELEMENTARY LIBRARIES FOR OVER TWENTY YEARS. IT WAS DESTINY. I HAVE BEEN BLESSED TO TEACH EVERY GRADE - KINDERGARTENERS THROUGH SENIORS IN HIGH SCHOOL. I THINK THAT GAVE ME AN ADVANTAGE TO TEACHING, ESPECIALLY IN HIGH SCHOOL. I WAS AWARE OF WHAT MATH SKILLS NEEDED TO BE MASTERED BEFORE GOING TO THE NEXT LEVEL MATH AND COULD ADJUST MY TEACHING TO THE NEEDS OF MY STUDENTS.

I HAVE BEEN BLESSED WITH AMAZING STUDENTS OVER MY THIRTY-THREE YEARS OF TEACHING AND AM SO FORTUNATE THAT I’VE GOTTEN TO SEE THEIR GROWTH INTO ADULTHOOD AND THEIR PROFESSIONS. AFTER SPENDING THE LAST TEN YEARS OF PREACHING TO STUDENTS HOW IMPORTANT UNDERSTANDING STATISTICS CAN BE TO ANY COLLEGE MAJOR, I HAVE BEEN GETTING MANY CONFIRMATIONS THAT IT IS A USEFUL TOOL TO HAVE IN COLLEGE! EVEN ONE STUDENT IS GETTING HER DOCTORATE IN STATISTICS.
I have truly been blessed through a rewarding profession and making so many life-long relationships with not only fellow teachers and administrators, but so many wonderful students. I am very grateful for my family putting up with the many, many papers being graded and last minute changing of lesson plans throughout these years."

Mike Jackson
Farmington High School
Farmington, AR

“I went to Missouri State University in Springfield, MO, for my bachelors in chemistry education, and I got my Masters in Educational Leadership from University of Arkansas. I’ve been teaching science in Farmington for fifteen years, and I’ve taught freshman physical science through Advanced Placement Chemistry and Advanced Placement Physics. Since 2016, I have worked with the College of Engineering’s POETS (Power Optimization for Electro Thermal Systems) Research Center in a Research Experience for Teachers program. I have the opportunity to place high school students with a strong aptitude for science and engineering into graduate level summer research positions.”
"I am very blessed to have found my passion in life and share that with students everyday in the classroom. People always told me I would be a great teacher, but I was determined to become an optometrist and not set foot in a high school again. After job shadowing an optometrist, I realized that being in an office was not for me. So, I started looking at the activities I enjoyed and realized that I loved teaching swimming lessons, working as a Junior Leader in 4-H, and helping in my community with any activity related to coaching and teaching kids. Math had always been my favorite subject in school, but I was drawn to the hands-on lab environment of a science classroom. I graduated from Kansas State University with a BS in Biology (1998) and Secondary Education (1998) along with my MS in Educational Curriculum (2003).
I taught my first classes in chemistry in 1999 and have enjoyed it ever since. My favorite part of teaching is seeing the light bulb moments and helping students discover a passion for science. I try to treat each student in my room as my own child and make a personal connection. Pushing students to be the best version of themselves is the most rewarding part. Some excel at the content, others are awesome at doing demonstrations for elementary students, and others are great lab team members.

Education has always been a priority in my family. However, none of this would be possible without the support from my husband, James and two daughters (Abbie and Emily). I am also blessed to work with a great team of teachers and staff at Maize High School. Being a teacher is my calling in life and I look forward to continuing to help students find theirs.”

The Scholarships and Awards Listed in this document represent more than $1,364,127.11 in direct support of Chemical Engineering students.
The Ralph E. Martin Department of Chemical Engineering faculty and staff are very grateful for the support provided by companies and individuals. The department would not be able to provide scholarships to many of our students, student activities, or upgrade and improve our laboratories and facilities without these financial contributions.

We sincerely thank our alumni, participating companies and many other individuals for their support in the form of time and effort. Not to be excluded from this acknowledgement are the Chemical Engineering students and their parents, who contribute time and talents, in addition to tuition and fees.
